Information For the Pre-Requisite Basic Pistol Course – Instructor Led

The NRA has required the Basic Course be taught in example for several years now. In the curriculum you will note that a Basic Student has a choice to take the online (Blended Learning), or Instructor Led class. As an Instructor Candidate, I recommend you take the Instructor Led Course. While your record of attendance and passing is electronic and should show immediately, if you choose to take another NRA Basic Pistol Shooting Course, please get a certificate before leaving that class to present to us for admission into the Instructor Course. A pre-arranged shooting qualification time will need to be setup with us prior to the February course.
